## **Introduction**

This report covers the twelve airports: Birmingham, Doncaster, Gatwick, Heathrow, Humberside, Leeds Bradford, Liverpool, London City, Luton, Manchester, East Midlands and Stansted.

The CAA would like to extend their thanks to all the many people that helped ensure that the information collected during the 2010 survey met the highest possible standards.

## **History**

Since 1968 a series of surveys has been undertaken to obtain information about air travellers and the determinants of the travel market. These surveys have been designed to obtain information of a kind that could not be collected on a routine basis from the air transport industry.

The surveys have included questions on journey purpose, final and intermediate surface origins/destinations, means of transport to and from airports, route flown, country of residence and income. This information is used in assessing the type of market served by airports and consequently for forecasting air transport demand and for planning airport facilities.

Cycles of surveys were undertaken at major UK airports in the periods 1970-1972, 1975-1978, 1982-1987 and 1990-1996. Each cycle covered, by sample, 95% of terminal passengers in the UK and usually surveys were arranged so that airports in the same broad regions were surveyed at the same time.

Following the 1996 survey run at the five London airports, Birmingham, Manchester and four Scottish Airports demand built up for more regular survey data. After a consultation process with all interested parties, it was decided to run the survey continuously at Gatwick, Heathrow and Manchester Airports. Further information about survey cycles, including results from previous studies can be found on our website <http://www.caa.co.uk/surveys>.

## **Planning for 2010**

In planning the 2010 Passenger Survey, the principal concern was to derive maximum value from the information collected, but at the same time to minimise passenger inconvenience. Therefore, it was necessary to impose a constraint on questionnaire length and content, in order to cause as little disruption as possible to passenger flow. To cause minimum delay, most passengers were interviewed whilst waiting to board their aircraft.

The Authority used its own interviewers and the survey ran throughout the whole of 2010, with shifts in each month carefully structured so that all scheduled routes and in most cases all flights within a route were regularly sampled. Further information about the sampling procedures employed can be found on our website <http://www.caa.co.uk/surveys>.

## Questionnaire

Several interested parties were consulted over the content of the questionnaire, including government departments and airport and airline management groups. The questionnaires were similar to previous survey questionnaires in that the same basic questions appeared but a number of new questions were included specifically for the co-sponsors of the 2010 survey. Sample questionnaires used on the 2010 Survey can be found on our website <http://www.caa.co.uk/surveys>.

## Tabulations

There are twenty-one standard tabulations included in this summary report that examine the principal travel patterns observed at each of the eight airports surveyed throughout 2010.

Further information about the definitions used throughout this report can be found on our website <http://www.caa.co.uk/surveys>.

Those readers that wish to continue their analysis of traffic patterns observed at the airports covered in this report are encouraged to contact us directly at [aviation.intelligence@caa.co.uk](mailto:aviation.intelligence@caa.co.uk). CAA is able to provide tailor prepared subsets of survey data, designed to answer specific questions. Our data fees start from £135GBP + vat.

Whilst every care has been taken in producing the summary analysis found in this report, mistakes can occur. Should any reader believe that they have found any inconsistencies throughout this report we would be pleased to hear about them. Please contact us at [aviation.intelligence@caa.co.uk](mailto:aviation.intelligence@caa.co.uk)

Totals may appear not to balance due to rounding.

## Copyright

Where every care has been taken to ensure that all figures quoted in this publication are correct, the Authority **accepts no liability** for errors made and any consequential misuse or misinterpretation of the data.

Extracts from this report may be copied but appropriate accreditation should be given to the Civil Aviation Authority.
